

PITTMAN GUARDZ SUB-SURFACE MOUNT HOOP BARRIER

OVERVIEW

The Pittman Guardz Sub-Surface Mount Hoop Barrier is a tall, slim-profile barrier designed to protect columns, pillars, lamp posts, and vertical infrastructure in warehouses, retail spaces, and industrial environments.

Designed to absorb impacts from pallet trucks, trolleys, and other light equipment, it helps prevent accidental damage to structural supports and critical assets.

The barrier is hot-dip galvanised for long-term corrosion protection and installs via sub-surface mounting, with each leg embedded directly into the concrete floor. Its lightweight yet durable construction makes it an ideal choice for areas where full heavy-duty protection is not required but safeguarding against minor collisions is essential.

pittman[®]

FEATURES

- Tall, narrow profile – ideal for safeguarding columns and pillars
- Sub-surface mount – secure, clean finish with no exposed plates
- Hot-dip galvanised – resists rust and corrosion
- Suitable for warehouses, retail, and industrial environments

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product Code	755880
Width	400 mm
Height (total)	1000 mm
Weight	21kg
Diameter	50 mm
Material	Galvanised Steel
Finish	Hot-dip Galvanised
