

PITTMAN 76MM STAINLESS STEEL RETRACTABLE BOLLARD

pittman[®]

OVERVIEW

The Pittman 76mm Stainless Steel Retractable Bollard is a smart and reliable solution for controlling vehicle access in car parks, commercial premises, and restricted areas. Manufactured from high-quality 304 stainless steel, it offers excellent durability and corrosion resistance for long-lasting outdoor performance.

Its retractable design allows authorised access when needed, while the secure keylock mechanism helps prevent unauthorised entry and ensures the bollard remains firmly locked in both the raised and lowered positions. Designed for reliable day-to-day operation, it provides an effective solution for controlling vehicle access without compromising convenience. Finished in a sleek satin polish, it delivers a professional appearance that complements a wide range of commercial, industrial, and public environments.

Easy to operate and install, the Pittman 76mm Stainless Steel Retractable Bollard is a dependable choice for flexible, secure, and convenient access control.

FEATURES

- 304 stainless steel construction – provides excellent durability and corrosion resistance
- Retractable telescopic design – allows access when required and secures areas when raised
- Integrated locking system – securely locks the bollard in position to help prevent unauthorised access.
- Satin polished finish – delivers a clean, professional appearance suitable for a range of environments
