

SHEFFIELD CYCLE STAND - SURFACE MOUNT

** Photos are for illustrative purposes only

OVERVIEW

The Sheffield Cycle Stand offers a secure, durable, and practical solution for bike parking in public, commercial, and high-traffic spaces. Designed for long-term use, it features extended bars for direct casting into concrete, creating a tamper-resistant installation that aligns neatly with surface-mounted options.

Crafted from hot-dip galvanised steel, the stand is built to withstand rust and corrosion, delivering reliable performance year after year in outdoor environments. For added flexibility, it can also be fitted with retention sockets, making it easy to remove and reinstall when required—without the hassle of repeated groundworks.

The classic Sheffield design provides excellent support by allowing bikes to be locked through both the frame and wheels, significantly reducing the risk of theft. With correct spacing during installation, the stand ensures convenient access for multiple users, making it a trusted choice for towns, schools, offices, and transport hubs.

FEATURES

- Secure & space-saving – Reliable bike parking that fits seamlessly into any setting
- Sleek, professional look that enhances public spaces
- All-weather durability – Designed to perform in any outdoor environment
- Surface mount – quick and secure installation on concrete or paving

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product Code	797814
Height	750 mm
Width	800 mm
Material	Hot-dip galvanised steel (in accordance with BS EN ISO 1461)
Diameter	Steel 48
Color	Steel
