Collection container in light alloy for files, data material and other documents

Model: D 3009 / 415 and D 3009 / 656

Material: Light alloy

Equipment:

- Circumferential top and bottom rims reinforce the container walls
- Walls reinforced with trapezoidal ribbing
- Castor arrangement B (2 fixed and 2 swivel castors) wheel, 125 mm dia., non-marking full rubber wheels in steel castor forks, with roller bearings and thread guard
- Both swivelling castors fitted with brakes in accordance with DIN EN 1757-3

Lid type D 3009 / 415

- Hinged lid with overhanging rim
- 2 toggle fasteners

Lid type D 3009 / 415 E1HS and D 3009 / 415 E2HS

- Hinged lid with overhanging rim and 2 retaining straps
- Insertion slot 420 x 27 mm, secure against hand entry
- Option of 1 or 2 toggle fasteners with integrated cylinder lock

Lid type D 3009 / 656

- Hinged lid with overhanging rim
- 2 toggle fasteners

Lid type D 3009 / 656 E2HS

- Hinged lid with overhanging rim and 2 retaining straps
- Insertion slot 420 x 27 mm, secure against hand entry
- 2 toggle fasteners with integrated cylinder locks

Options:

- Different locking systems available
- Embossed labels in 20 mm font size in accordance with DIN

Special designs and sizes

The light alloy material we use, our flexible manufacturing options and our extensive experience in the design of custom-made solutions to match customer requirements allow us to keep our prices competitive even for small production runs.

The GMÖHLING service team will be happy to help you make the right choice of container and respond to any requirements and questions you may have. Simply give us a call or send us an email.

Just a few examples of our individual solutions:

Robust disposal container with lift frame and insertion unit for files

Secure collecting bin with hatch, also suitable for CD ROMs

Collection container with slanted floor

Collection container with 4 wheels and document holder

We are certified!
Have confidence in our quality!

Certified for:
Design, development, manufacturing and
distribution of aluminium systems
