ALUMINIUM EXPANDABLE BARRIER

Light and durable expanding protection

pittman[®]

OVERVIEW

The Aluminium Expandable Barrier offers a versatile solution for controlling access in a wide range of settings. Its lightweight design makes it easy to move and set up, yet it remains durable enough for long-term use.

The compact folding mechanism allows it to be stored efficiently when not in use, taking up minimal space. Whether you need a temporary or more permanent solution, the barrier's adaptable design allows for both free-standing or secure bolt-down options.

Its high-visibility black and yellow colouring ensures it stands out, making it ideal for directing foot traffic or marking off restricted areas. Multiple barriers can also be easily linked together for extended coverage when needed.

PRODUCT FEATURES

- Lightweight but durable - light aluminium with long-lasting design
- Versatile - plastic feet for free-standing or bolt down option
- Transportable - folds up to just 250mm wide when not in use
- Hook system - easily connect with multiple units
- Visible - highly noticeable black and yellow design

TECHNICAL DATA

SPECIFICATION	DETAILS
Material:	Aluminium
Color:	Black and Yellow
Width (fully expanded):	3000mm
Width (closed):	250mm
Height:	960mm
Depth:	330mm
Weight:	6kg
Applications	Wide range of applications including; warehouses, indoor car parks, factories, schools

Plastic Feet
Optional free-standing or bolt-down design

Hook system
Easily attach the aluminium barrier to other units
