

AUTOBAHN FOLD DOWN PARKING POST

pittman®

OVERVIEW

The Autobahn Fold Down Parking Post is designed to provide reliable parking protection and access control across commercial, industrial and residential environments. Ideal for preventing unauthorised parking, securing private spaces and managing vehicle access, the post offers a durable and practical solution for a variety of outdoor applications.

Manufactured from heavy-duty steel with a hot-dip galvanised and powder-coated finish, the post provides excellent resistance to corrosion and everyday outdoor conditions. Its 900mm height and reflective side strips ensure high visibility, while the integrated Euro-profile cylinder lock allows for convenient access without bending down.

Designed for surface-mounted installation, the post features a fold-down mechanism that allows vehicles to pass when required. It can be bolted directly to a suitable concrete surface using fixings purchased separately. An optional ground anchor provides additional stability for installation on tarmac and other surfaces, offering a flexible solution for secure parking and vehicle access.

FEATURES

- Flexible Key Options – Available keyed alike or keyed differently to suit access requirements.
- Heavy-Duty Construction – Hot-dip galvanised steel for excellent corrosion resistance.
- Fold-Down Design – Allows convenient vehicle access when required.
- Easy Installation – Bolt-down design with optional ground anchor for added stability.

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product	Autobahn Fold Down Parking Post
Product Code	SKU: 752336 *(Keyed Differently)* SKU: 752337 *(Keyed Alike)*
Height (Above Ground)	900 mm
Height (Below Ground)	180 mm
Width	70 mm Squared
Weight	9.15 KG
Material	Hot-Dip Galvanised Steel
Base Plate	100 x 150mm
Key Information	Includes 3 keys per bollard
