

BENITO GREENWAY BOLLARD

pittman[®]

OVERVIEW

Designed for outdoor environments, ReBnew is weather-resistant and highly resistant to oils, acids, and seawater. Unlike traditional timber alternatives, it will not splinter, crack, rot, dry out, or require repainting making it an ideal choice for local authorities, greenways, and commercial developments.

The bollard includes a white and red reflective ring for improved visibility, helping to enhance safety in low-light conditions.

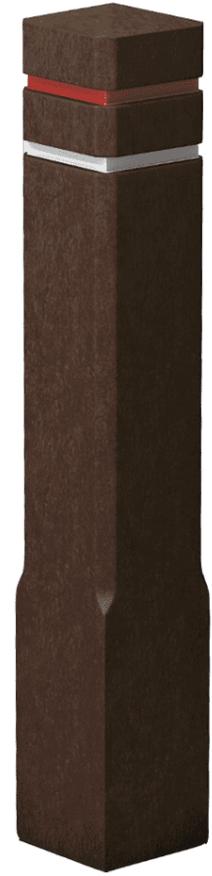

Its irregular surface finish adds extra durability by helping to conceal scratches caused by vandalism. If surface marks do occur, they can be repaired to restore the bollard to a like-new finish.

FEATURES

- **Recycled Material:** Made from ReBnew, BENITO's 100% recycled plastic polymer.
- **No Maintenance Required** – won't rot, splinter, or crack.
- **Reflective Strip** - Includes a white and red reflective ring for improved visibility.
- **Weather Resistant** - Highly resistant to weather, seawater, oils, and acids.

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product Code	713754
Height	1400 mm
Diameter	140 mm
Width	140 mm
Material	100% recycled plastic polymer.
Color	Brown
Reflective Strip	Red and White Reflective Strip
