

BLACK BULL HYBRID FLEXIBLE BARRIER KIT

pittman[®]

OVERVIEW

The Black Bull Hybrid Flexible Barrier Kit is designed to provide reliable protection in busy industrial environments where pedestrians, equipment, and workplace traffic need to be safely separated. Combining heavy-duty steel posts with flexible polypropylene rails, it provides a robust standalone solution for areas with forklifts, pallet trucks, carts, and other workplace vehicles.

Its hybrid construction uses the natural elasticity of the polypropylene rails to absorb impacts and help reduce damage. Available in semi-rigid or flexible versions, the flexible option includes the Flex Pad System, allowing impacts to be dispersed through the posts before reaching the ground.

Designed for straightforward bolt-down installation, the barrier is available in 1000mm, 1500mm, and 2000mm lengths to suit different applications. Its highly visible design improves awareness around busy work areas, while optional Flex Pads provide increased flexibility where additional impact absorption is required.

FEATURES

- Hybrid Construction – combines heavy-duty steel posts with flexible polypropylene rails for reliable impact protection.
- Semi-Rigid or Flexible – choose standard flexible rails or add Flex Pads for increased impact absorption.
- Protects People & Assets – ideal for areas with forklifts, pallet trucks, carts, equipment, and pedestrians.
- Quick Bolt-Down Installation – standalone modular design available in 1000mm, 1500mm, and 2000mm lengths.

TECHNICAL DATA

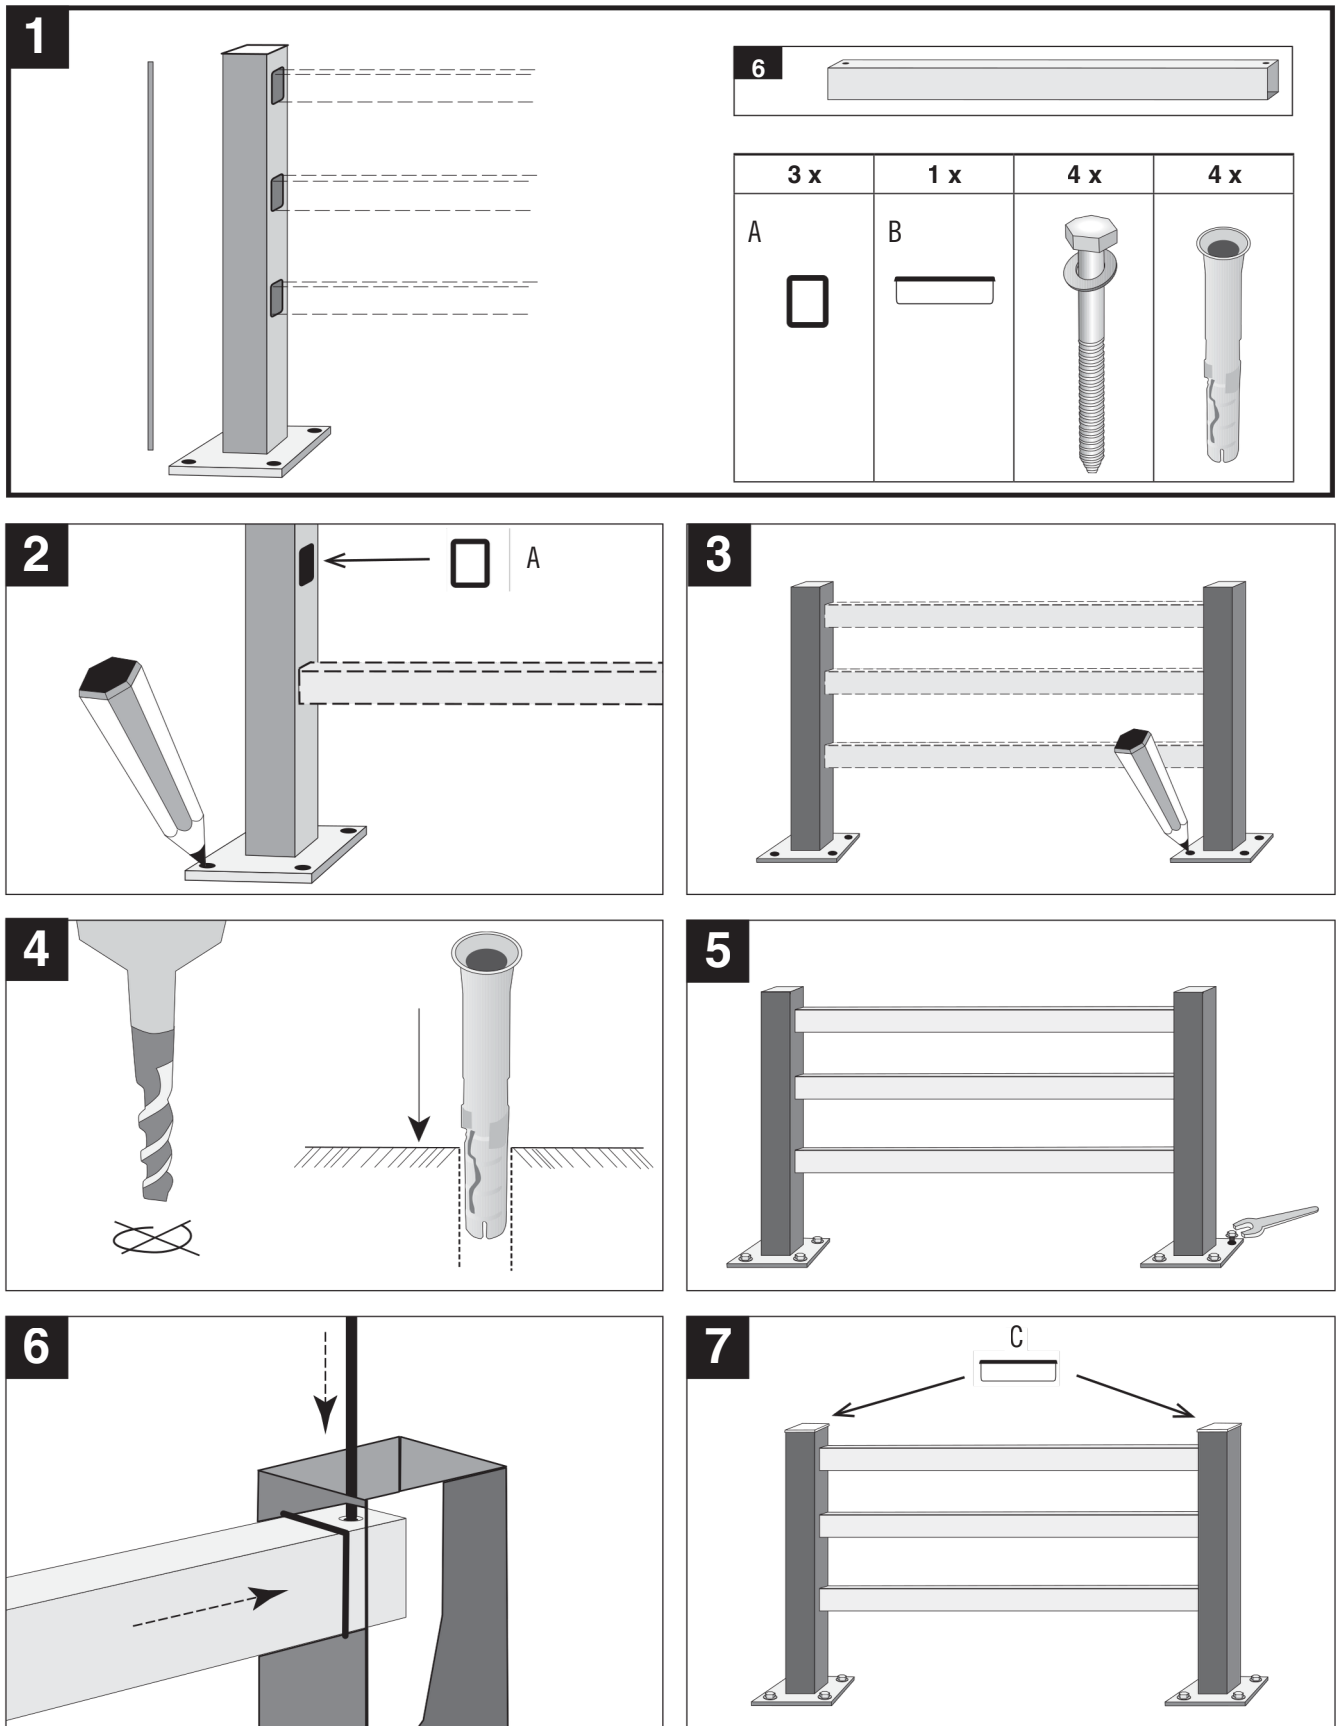

SPECIFICATION			
Product Code (Flex Pad Included)	SKU: 750330	SKU: 750331	SKU: 750329
Product Code (No Flex Pad)	SKU: 750325	SKU: 750321	SKU: 750322
Lenght	1000 mm	1500 mm	2000 mm
Height (With Flex Pad)	1040 mm		
Height (No Flex Pad)	1000 mm		
Weight (With Flex Pad)	36.00 kg	37.50 kg	38.00 kg
Weight (No Flex Pad)	36.50 kg	38.00 kg	38.50 kg
Wall Thickness	3 mm		
Finish	Powder Coated Yellow		
Material	Steel and polypropylene
