

A photograph of the Black Bull Low Profile Hybrid Railing System installed in a warehouse. The system consists of black steel posts and bright yellow polypropylene rails. A red fire extinguisher is visible in the background.

BLACK BULL LOW PROFILE HYBRID RAILING SYSTEM

pittman[®]

OVERVIEW

The Black Bull Low Profile Hybrid Railing System is designed to provide reliable protection in busy indoor environments where pallet racking, low walls, partition areas, and other workplace infrastructure are at risk from vehicle impact. Combining heavy-duty steel posts with flexible polypropylene rails, it provides a robust low-level solution for warehouses, factories, and industrial facilities.

Its hybrid construction allows the polypropylene rails to bend on impact, helping to absorb impact forces and reduce damage caused by workplace vehicles. The high-visibility yellow design improves awareness, while the steel posts feature a durable powder-coated finish for professional indoor use.

Designed for quick and straightforward installation, the system bolts directly into the ground, with lateral rails simply inserted between the supporting posts. Available in 1m, 1.5m, and 2m rail lengths, the system can be configured to provide low-level protection exactly where it is required.

FEATURES

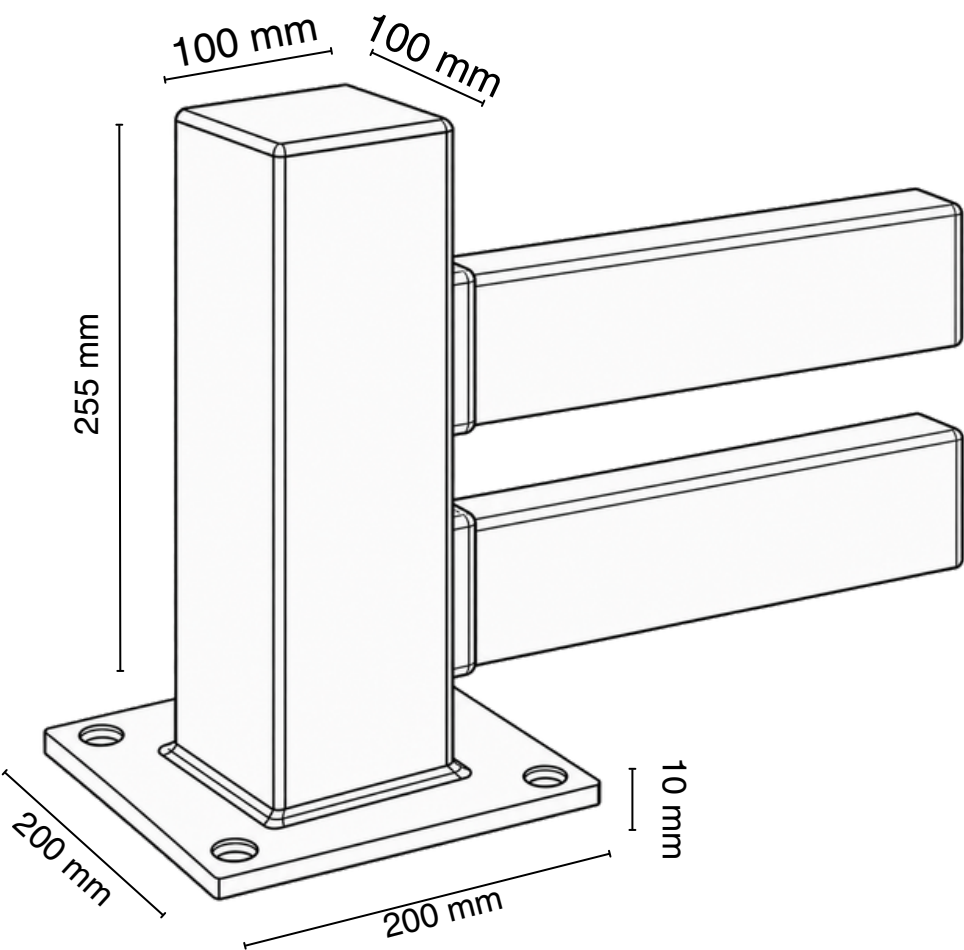

- Hybrid Construction – combines heavy-duty steel posts with flexible polypropylene rails for reliable low-level protection.
- Flexible on Impact – polypropylene rails bend on impact to help absorb force and reduce potential damage.
- Protects Low-Level Assets – ideal for safeguarding pallet racking, low walls, partitions, and workplace infrastructure.
- High-Visibility Design – bright yellow finish improves awareness in busy warehouses and industrial environments.

TECHNICAL DATA

SPECIFICATION			
Post Type	End Post	Middle Post	Corner Post
Product Code	SKU: 750328	SKU: 750324	SKU: 750327
Height	255 mm		
Width x Depth	100 mm X 100 mm		
Base Plate	200 x 200 x 10mm		
Finish	Powder Coated Black		
Material	Steel		
Weight	6.50 kg		14.00 kg
