

CARGO BIKE ANTI-THEFT HOOP

pittman[®]

OVERVIEW

The Cargo Bike Anti-Theft Hoop provides a secure and practical solution for parking two and three-wheeled cargo bikes. Designed to provide a dedicated locking point at the lower part of the bike, the stand helps deter theft and is suitable for commercial premises, workplaces, residential developments and public spaces.

Manufactured from Ø50mm steel tubing, the stand features a primer coat and polyester powder-coated finish for effective protection against rust and corrosion. Suitable for both indoor and outdoor use, it is available in two colour options: Corten Colour and Anthracite Grey. Its low-profile design allows cargo bikes to be secured close to the ground.

Designed for quick and easy surface-mounted installation, the stand is supplied with six tamper-resistant screws and concrete plugs for secure fixing. Measuring 820(L) x 160(W) x 200(H) mm, it provides a compact locking point for cargo bikes. An included cargo bike pictogram sticker helps identify its intended use, making the stand a practical addition to dedicated cargo bike parking facilities.

FEATURES

- Cargo Bike Security – Provides a secure locking point for two and three-wheeled cargo bikes.
- Durable Steel Construction – Manufactured from robust Ø50mm steel tubing.
- Corrosion-Resistant Finish – Primer and polyester powder coating for indoor and outdoor use.
- Easy Installation – Surface-mounted design with security screws and concrete plugs included.
