

Defender Flex Plus Warehouse Bollard Ø 152mm

OVERVIEW

The Defender Flex Plus Warehouse Bollard provides heavy-duty impact protection for warehouses, factories, loading bays and industrial environments, helping to protect buildings, equipment and personnel from forklift and vehicle damage.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use.

Its Ø152mm steel construction features an internal heavy-duty spring that allows the bollard to flex upon impact, helping to absorb force and reduce damage to both vehicles and surrounding assets. Finished in powder-coated yellow, the bollard is also available in plain galvanised and red/white finishes, with a 1500mm height option available on request.

The surface mount design features pre-drilled fixing holes for straightforward bolt-down installation directly onto concrete surfaces, providing a durable and practical solution for protecting warehouse racking, doorways and other vulnerable areas.

FEATURES

- **Impact Absorption –** internal heavy-duty steel spring allows the bollard to flex upon vehicle impact.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **Durable Finish –** powder-coated yellow for resistance to fading and scratching, with alternative finishes available.
- **Surface Mount Installation –** bolt-down design with pre-drilled fixing holes for secure installation onto concrete.

TECHNICAL DATA

SPECIFICATION	DETAILS
Product code	727844
Total Height	1000 mm (Available in plain galvanised, red/white and 1500mm high on request)
Weight	30 kg
Diameter	152 mm
Finish	Powder-coated yellow for resistance to fading and scratching
Material	Hot-dip galvanised steel - resistant to rusting
Mounting	Sub-Surface Bolt-down - easy installation directly to concrete
Wall Thickness	3.2 mm
