

Defender Flexi Warehouse Bollard Ø 76mm

OVERVIEW

The Defender Flexi Warehouse Bollard provides reliable impact protection for warehouses, factories, loading bays and industrial environments, helping to protect buildings, equipment and personnel from vehicle damage.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use.

Its Ø76mm steel construction features an internal rubber spring at the base, allowing the bollard to tilt up to 30° upon impact. This flexible design helps absorb impacts from forklifts and other work vehicles, reducing the risk of damage to both the bollard and surrounding assets. Finished in powder-coated yellow with three black bands, it provides a durable solution for busy industrial environments.

The surface mount design allows for straightforward bolt-down installation directly onto existing concrete surfaces, with four pre-drilled fixing points for secure installation. Optional chain eye points are also available for connecting multiple bollards to restrict access to designated areas.

FEATURES

- **Flexible Impact Protection –** internal rubber spring allows the bollard to tilt up to 30° upon impact.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **Easy Installation –** surface-mounted design with four pre-drilled fixing points for bolt-down installation.
- **Optional Chain Eyes –** allows chains to be connected between bollards to restrict access.

TECHNICAL DATA

SPECIFICATION	DETAILS
Product code	748045
Height	900 mm
Base Plate	100 x 150 mm
Diameter	Ø 76 mm
Finish	Hot-dip galvanised steel - reduces rusting or corrosion
Material	Galvanised Steel
Mounting	Surface Mount
Bollard tilt	30° angle upon impact - reduces damage
Weight	7.5 kg
