

HEAVY DUTY MODULAR STEEL RAILING FOR CUSTOM REQUIREMENTS

pittman[®]

OVERVIEW

The Defender Protective Railing System is designed to provide reliable protection in busy industrial environments where pedestrian and vehicle segregation is essential. Combining heavy-duty steel posts and lateral rails, it provides a robust solution for creating safe walkways, defining traffic lanes, and protecting machinery, equipment, and work areas.

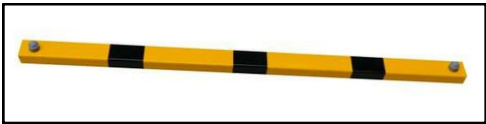

Its durable steel construction features a hot-dip galvanised and powder-coated finish for excellent corrosion resistance and long-lasting performance. The high-visibility yellow and black design improves awareness, while its anti-nudge properties help protect against accidental impacts from workplace traffic.

Designed with a modular configuration, the system can be customised using lateral rails ranging from 800mm to 2300mm in length to suit different layouts. The posts bolt directly into concrete for secure installation, while flexible or removable posts and a red-and-white finish are also available as special-order options.

FEATURES

- Heavy-Duty Steel Construction – provides robust protection for pedestrians, machinery, equipment, and work areas.
- Hot-Dip Galvanised Finish – galvanised and powder-coated steel provides excellent corrosion resistance and long-lasting performance.
- Modular Design – available with 800mm, 1300mm, 1800mm, and 2300mm lateral rails for customised layouts.
- High-Visibility Protection – yellow and black design improves awareness while helping protect against accidental workplace impacts.

TECHNICAL DATA

SPECIFICATION				
Product Code	SKU: 752532	SKU: 752533	SKU: 752534	SKU: 752535
Lenght	800 mm	1300 mm	1800 mm	2300 mm
Width	60 mm			
Depth	40 mm			
Wall Thickness	4 mm			
Finish	Coated Yellow			
Material	Galvanishot-dip galvanizeded Steel
