

Defender Reflex Warehouse Bollard

OVERVIEW

The Defender Reflex Warehouse Bollard provides reliable impact protection for warehouses, factories, loading bays and industrial environments, helping to protect buildings, machinery and valuable infrastructure from accidental vehicle damage.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use.

Its heavy-duty rubber spring system allows the bollard to flex up to 30° upon impact before returning to its upright position. This flexible design helps absorb impacts from forklifts and other work vehicles, reducing the risk of damage to both vehicles and surrounding assets. Available in Ø76mm and Ø89mm round designs or a 70 × 70mm square design, the bollard provides a practical solution for busy industrial environments.

The surface-mounted design allows for straightforward bolt-down installation directly onto existing concrete surfaces, with four pre-drilled fixing points for secure installation. An optional base cover is also available to protect the rubber spring mechanism from damage during everyday use.

FEATURES

- **Flexible Impact Protection –** heavy-duty rubber springs allow the bollard to bend up to 30° and return upright.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **Easy Installation –** bolt-down design with four pre-drilled fixing points for secure installation.
- **Optional Spring Cover –** protective base cover helps shield the rubber spring mechanism from damage.

TECHNICAL DATA

SPECIFICATION	DETAILS		
Design	Round Post		Square Post
Product code	752507	752444	752509
Total Height	950 mm		
Mounting	Surface Mount		
Diameter	76 mm	89 mm	70 x 70 mm
Material	Galvanised with yellow/black warning stripes		
Base Plate	220 x 220 mm		
Finish	Hot-dip galvanised steel - protected agains rust		
Post Tilt	30°
