

Defender Removable Warehouse Bollard

OVERVIEW

The Defender Removable Warehouse Bollard provides reliable protection for warehouses, factories, loading bays and industrial environments, helping to protect buildings, equipment and restricted areas from accidental vehicle damage while allowing temporary access when required.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use. Its powder-coated finish provides additional surface protection and long-lasting colour retention.

Available in Ø76mm and Ø89mm round designs or a 70 × 70mm square design, the bollard provides durable protection in busy areas with frequent forklift and workplace vehicle movement. Its removable construction makes it particularly suitable for locations where vehicle access requirements may change.

The surface-mounted design features an integral plate system that allows the bollard to be securely bolted onto concrete and removed when necessary using integrated hex screws. This provides a practical solution for maintaining protected areas while allowing convenient access for deliveries, maintenance and other operational requirements.

FEATURES

- **Removable Design –** integral plate system allows the bollard to be removed using hex screws when access is required.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **Flexible Installation –** Multiple Sizes – available in Ø76mm, Ø89mm and 70 × 70mm square designs.
- **Easy Installation –** bolt-down base plate allows straightforward installation onto concrete surfaces.

TECHNICAL DATA

SPECIFICATION	DETAILS		
Design	Round Post		Square Post
Product code	752513	752514	752515
Total Height	1000 mm		
Mounting	Surface Mount		
Diameter	76 mm	89 mm	70 x 70 mm
Material	Galvanised with yellow/black warning stripes		
Weight	9 kg		
Finish	Hot-dip galvanised steel - protected agains rust		
Base Plate	150 x 180 mm
