

Defender Warehouse Bollard (Bolt-Down) Ø 60mm

OVERVIEW

The Defender Warehouse Bollard (Bolt-Down) provides reliable protection for warehouses, factories and industrial environments, helping to protect pallet racking, machinery and building infrastructure from accidental vehicle impacts.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use.

Its Ø60mm steel construction provides a practical, lighter-duty protection solution for areas with regular forklift and workplace vehicle movement. Finished in powder-coated yellow, the bollard offers increased visibility while maintaining a durable, hard-wearing finish.

The surface-mounted design allows for straightforward bolt-down installation directly onto existing concrete surfaces. Its base plate features four pre-drilled fixing points for secure installation, making it ideal for protecting vulnerable areas throughout warehouses and industrial facilities.

FEATURES

- **Lighter-Duty Protection –** Ø60mm steel construction helps protect warehouse assets from accidental impacts.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **High Visibility –** powder-coated yellow finish helps the bollard stand out in busy industrial environments.
- **Easy Installation –** bolt-down base plate with four pre-drilled fixing points for secure installation.

TECHNICAL DATA

SPECIFICATION	DETAILS
Product code	900184
Height	900 mm
Finish	Hot-dip galvanised steel - reduces rusting or corrosion
Material	Galvanised Steel
Mounting	Surface Mount
Diameter	Ø 60mm
