

Defender Warehouse Bollard (Surface Mount) Ø 152mm

OVERVIEW

The Defender Warehouse Bollard (Surface Mount) provides heavy-duty impact protection for warehouses, factories, loading bays and industrial environments, helping to protect buildings, equipment and personnel from vehicle damage.

Manufactured from hot-dip galvanised steel, this bollard offers excellent resistance to rust and corrosion, making it suitable for both indoor and outdoor use.

Its Ø152mm steel construction with a 3.2mm wall thickness provides robust, long-lasting protection in busy areas with frequent forklift and vehicle movement. Finished in powder-coated yellow with black bands, the bollard offers a durable solution for demanding warehouse environments.

The surface mount design features a steel base plate with four pre-drilled holes for straightforward bolt-down installation directly onto concrete surfaces. Optional post caps allow the bollard to be filled with concrete for additional strength when required.

FEATURES

- **Heavy-Duty Protection –** Ø152mm steel construction with 3.2mm wall thickness for reliable impact protection.
- **Corrosion Resistant –** hot-dip galvanised steel provides long-lasting protection against rust.
- **Durable Finish –** powder-coated yellow with black bands for long-lasting colour retention.
- **Surface Mount Installation –** bolt-down design with four pre-drilled holes for secure installation onto concrete surfaces.

TECHNICAL DATA

SPECIFICATION	DETAILS
Product code	752539
Height	1000 mm
Wall Thickness	3.2 mm
Diameter	152 mm
Finish	Hot-dip galvanised steel - protected agains rust
Material	Galvanised Steel
Mounting	Surface Mount
Base Plate	220 x 220 mm
