

PITTMAN 89MM REMOVABLE BOLLARD

pittman[®]

OVERVIEW

The Pittman 89mm Removable Bollard provides a secure and practical solution for controlling vehicle access while allowing authorised entry when needed. Designed for both commercial and residential environments, its removable design offers the flexibility to restrict or permit access with ease, making it ideal for a wide range of applications.

Manufactured from durable carbon steel with a robust E-coated and powder-coated finish, this bollard is built to withstand harsh outdoor conditions while resisting rust and corrosion. The integrated binaural handles allow for quick lifting and removal, while the secure padlock system helps prevent unauthorised access. A 250mm white reflective band enhances visibility in low-light conditions, improving safety for both drivers and pedestrians.

Suitable for driveways, commercial premises, car parks, pedestrian areas, car showrooms, and public spaces, the Pittman 89mm Removable Bollard offers a dependable and professional solution for managing vehicle access without compromising on security or durability.

FEATURES

- **Heavy-Duty Steel** – 3mm carbon steel with an E-coated and powder-coated finish for long-lasting durability.
- **Removable Design** – Integrated handles allow for quick and easy removal when access is needed.
- **High Visibility** – 250mm reflective band improves visibility in low-light conditions.
- **Secure Locking** – Built-in padlock system helps prevent unauthorised removal.

TECHNICAL DATA

SPECIFICATION	DETAILS
Product Code	SKU: 755874
Height (Above Ground)	965 mm
Height (Below Ground)	225 mm
Post Diameter	89 mm
Material	Carbon Steel
Finish	E-Coating & Powder Coating
Lock Type	Padlock (not included)
Mounting Type	Sub-Surface
