

PITTMAN GUARDZ PALLET RACK END PROTECTORS

pittman[®]

OVERVIEW

Protect your warehouse infrastructure with Pittman's Guardz Pallet Rack End Protectors, a heavy-duty solution designed to prevent impact damage to racking systems from forklifts, pallet trucks, and warehouse traffic.

Made from durable steel and finished with a galvanised and high-visibility powder coat, these rack protectors offer long-term resistance to corrosion and wear. The bright yellow and black design makes them easy to spot, helping to reduce collisions in high-traffic areas.

Ideal for use in warehouses, logistics centres, and distribution hubs, these protectors are an essential part of any warehouse racking protection system.

FEATURES

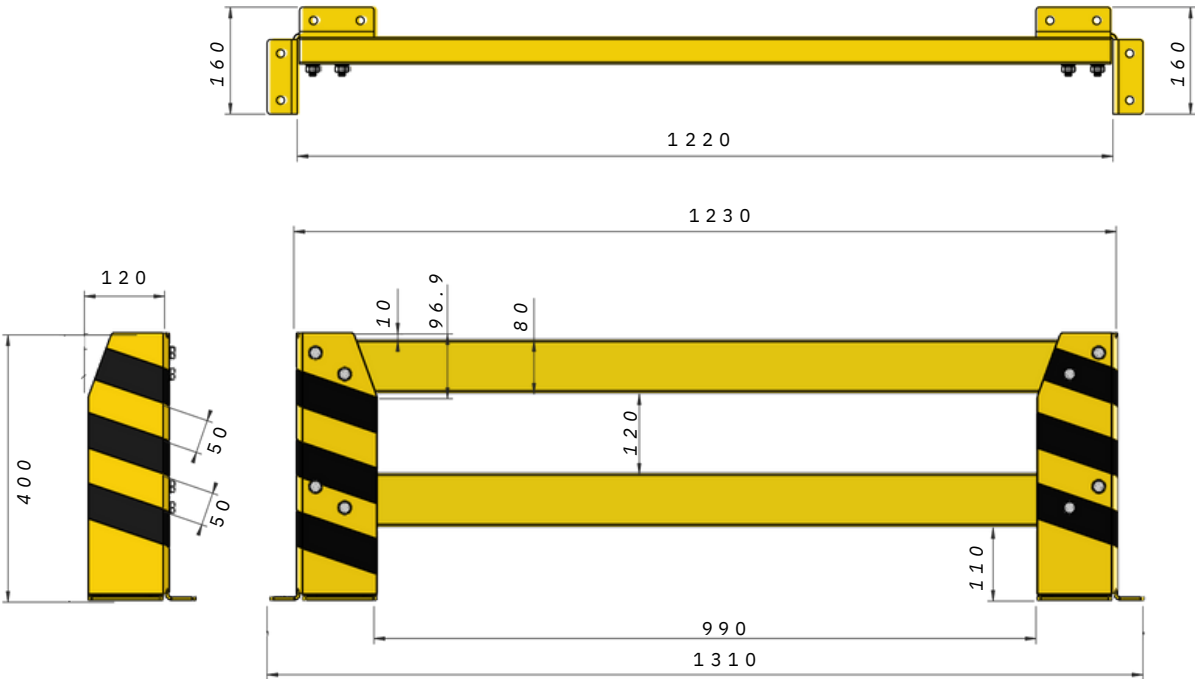

- Heavy-duty steel – absorbs forklift and pallet truck impacts
- Galvanised & powder coated – long-lasting and corrosion resistant
- Yellow and black finish – increased visibility to prevent collisions
- Warehouse-ready design – ideal for protecting racking in high-traffic areas

TECHNICAL DATA

Product Code	755850	755851
Width	1230 mm	2460 mm
Height	436.5 mm	436.5 mm
Depth	231.5 mm	
Material	Hot Dip Galvanised Steel	
Finish	Powder Coated	
Color	Yellow with Black Strips	
Fixings Included	No	
Recommended Fixings	8 x M10 x 110mm Coachscrew
