

PLASTIC CHAIN - 25 METRES

pittman[®]

OVERVIEW

The plastic chain 25-metre bags can be used to close off large spaces to pedestrians. The chains can be easily attached to chain eyes, hooks or hoops. Use to deter entry over large spaces.

Each chain link is made with highly durable plastic. They are suitable for use indoors or outdoors. If required the chain links can be cut on-site to suit requirements. Choose from highly visible red/white or black yellow designs. Each set of chains changes colours after 13 links.

Easily combine the chains with chain posts or bollards to instantly deter entry into an area. The chain can be cut easily with a sharp blade to create custom setups. Attach the chain via cut links or by separate chain connecting links, also available from us here at Pittman.

FEATURES

- 25m Length – Supplied in 25-metre bags with a durable 9mm link thickness.
- Easy Installation – Quickly attaches to chain links or hoops.
- Anti-Rust Protection – Helps prevent corrosion for longer lasting outdoor performance.
- Highly Visible – Alternating colour every 13 links for enhanced visibility.
