

PLASTIC SAFETY RUMBLE STRIP YELLOW

pittman[®]

OVERVIEW

The Polyurethane Rumble Strips are designed to provide an effective traffic-calming solution in areas where reducing vehicle speeds is essential. Suitable for light vehicles, they create a physical and audible warning as vehicles pass over them, encouraging drivers to slow down in designated areas.

Manufactured from highly durable polyurethane, the strips feature a vibrant yellow finish for excellent visibility to approaching drivers. Their robust construction makes them ideal for car parks, warehouses, roads and other traffic areas, while they can also be used to help separate traffic lanes.

Designed for straightforward installation, each 500mm strip bolts directly into the ground, allowing multiple sections to be positioned as required. The versatile design can also be mounted to walls for protection against trolleys, workplace machinery and other potential impacts. Fixings are required but are not included.

FEATURES

- **Highly Visible** – Vibrant yellow finish helps ensure the strips are clearly visible to approaching drivers.
- **Traffic Calming** – Creates a physical and audible warning to encourage drivers to reduce their speed.
- **Durable Construction** – Manufactured from polyurethane for long-lasting performance with light vehicle traffic.
- **Versatile Use** – Suitable for traffic calming, lane separation or use as a wall guard against trolleys and workplace machinery.

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product Code	SKU: 763661
Height	15 mm
Length	500 mm
Width	100 mm
Material	Polyurethane (PU)
Color	Yellow
