

SHEFFIELD CYCLE STAND - STAINLESS STEEL 304 - SUB- SURFACE

pittman[®]

OVERVIEW

The Sheffield Cycle Stand Stainless Steel 304 is a durable and practical bicycle parking solution ideal for schools, workplaces, hospitals and public spaces. Its space-efficient design accommodates up to two bicycles per stand, providing secure and organised bike storage.

Manufactured from high-quality 304-grade stainless steel, the stand offers excellent resistance to rust, corrosion and weathering in non-coastal environments. Its brushed satin finish provides a modern appearance, while the robust 48mm diameter tubular construction ensures long-lasting performance.

Designed for permanent concrete-in installation, the stand features clamped ends for secure placement without additional fixings. With an overall height of 1100mm and approximately 800mm visible above ground, multiple stands can be installed together to create dedicated bicycle parking areas.

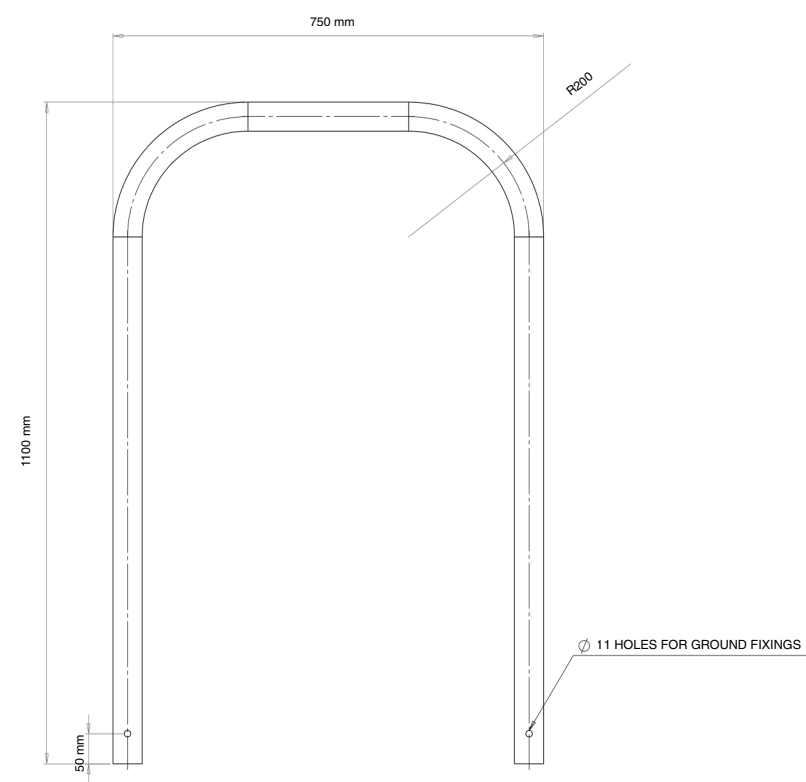

PRODUCT FEATURES

- 304-Grade Stainless Steel – excellent resistance to rust, corrosion and weathering.
- Secure Bicycle Parking – accommodates up to two bicycles per stand.
- Brushed Satin Finish – provides a clean, modern and professional appearance.
- Concrete-In Installation – secure permanent fixing without additional fixings.

ADDITIONAL INFORMATION

Warranty Information

The Stainless Steel Sheffield Cycle Stand is covered by Pittman's standard warranty terms. The product is warranted against defects in materials and workmanship for 6 months from initial use or 8 months from delivery, whichever occurs first.

For further details, please refer to our Terms & Conditions.

Certification

The Stainless Steel Sheffield Cycle Stand (P-895840) is confirmed by G.H. Pittman Ltd as a non-harmonised product under the Manufacturer Certificate of Non-Harmonised Product.

Maintenance

The Stainless Steel Sheffield Cycle Stand requires no specific maintenance or cleaning. It is recommended to periodically inspect the stand to ensure it remains securely installed and in good condition.
