

# STAINLESS STEEL BOLLARD BOLT DOWN Ø 76MM

**pittman**<sup>®</sup>

## OVERVIEW

The Pittman Stainless Steel Bollard Bolt Down provides a stylish and durable solution for enhancing safety and controlling vehicle access in public and commercial environments. Manufactured from high-quality 304-grade stainless steel, it offers excellent corrosion resistance and a professional mirror-like finish that complements a wide range of outdoor settings.

Designed for quick and straightforward installation, the bollard features a bolt-down base with pre-drilled fixing points, allowing it to be securely mounted to existing surfaces with minimal effort. Its sleek dome-top design delivers a clean, modern appearance while providing dependable perimeter protection.

Ideal for offices, retail parks, schools, supermarkets, and other public spaces, the Pittman Stainless Steel Bollard Bolt Down combines functionality with aesthetics, making it a reliable choice for projects that require both security and visual appeal.

## FEATURES

- 304 stainless steel construction – provides excellent durability and corrosion resistance for long-term outdoor use.
- Bolt-down installation – allows for quick and secure fixing to existing concrete and hard surfaces.
- Mirror-polished finish – delivers a professional appearance suitable for commercial and public environments.
- Heavy-duty protection – helps safeguard pedestrians, buildings, and infrastructure from vehicle impact.
