TERMINAL EXPANDABLE BARRIER

Built to Take a Hit, Designed to Spring Back.

pittman[®]

OVERVIEW

The Terminal Expandable Barrier is a reliable solution for quickly blocking off areas and restricting access. Standing 960mm tall and expanding to 3.4m wide, this barrier is ideal for use in warehouses, airports, and public buildings.

Its bright yellow color ensures visibility, while the durable construction and integrated brakes on the castors provide stability and safety.

Designed for flexibility, the barrier can be easily connected with additional units to cover larger areas, and when not in use, the barrier folds down to just 16.5 inches for easy storage.

PRODUCT FEATURES

- Durable design - made from tough, long-lasting plastic
- Compact storage - folds down to just 500mm wide
- Built-in wheels - allowing for easy movement on site
- Integrated brake - provides secure positioning, keeping the barrier in position
- Linkable end - join multiple barriers together to cover large areas

TECHNICAL DATA

SPECIFICATION	DETAILS
Material:	Plastic
Color:	Yellow & Black
Height:	960mm
Closed width:	500mm
Expanded width:	3400mm
Weight	6.8kg
Applications	Wide range of indoor applications including parking lots, warehouses, loading docks, school zones, walkways and industrial facilities.

BUILT IN WHEELS
Allows for easy movement on site, position the barrier as needed

LINKABLE END
Join together with other terminal barriers with ease

INSTRUCTIONS FOR USE

- 1. Expand the Barrier:** To expand, simply pull unhook the closure clasp and pull the barrier apart and engage the brake
- 2. Join Together:** Join multiple units together using the hook and eye system on the barrier.
- 3. Storage:** When finished, simply push the two sides together and secure with the hook.
