

VERTICAL BIKE RACK 4 HOOPS

pittman[®]

OVERVIEW

Maximise your bike storage with the Bike Stand with 4 Bike Hoops, designed for practical, organised, and space-saving bicycle parking.

This sturdy rack accommodates four bicycles — two in a vertical position and two in a semi-vertical position — with each bike easily secured using a U-lock, chain, or padlock for total peace of mind.

Ideal for bike rooms, workplaces, or public installations, the design helps optimise space and maintain a clean, efficient layout. Compatible with bikes featuring disc brakes and tyres up to 70 mm wide, it's a versatile solution for mixed-use environments. The stand is built from high-quality steel, supplied in two parts for quick assembly using screws and nuts, and must be fixed to the ground for maximum stability. For larger setups, multiple racks can be connected using the optional kit, making it easy to scale up as needed.

FEATURES

- It allows parking for 4 bicycles: 2 in a vertical position and 2 in a semi-vertical position, all of which can be secured with a U-lock, chain, etc.
- Strong steel tube frame with sandblasted black finish
- Ground-fix design for extra stability - the base is made of 2 parts, assembled with screws/nuts.
- Compatible with disc brakes and tyres up to 70 mm

TECHNICAL DATA

SPECIFICATIONS	DETAILS
Product Code	797875
Height	1550 mm
Width	630 mm
Material	Galvanised Steel
Steel Tube Dimensions	50x50 mm and 30x30 mm square tubes, with bike supports made of Ø16mm steel tubing,
Base Plate Dimensions	Mounting holes Ø12mm
Bike Spacing	430 mm
Weight	20 kg
