NEW
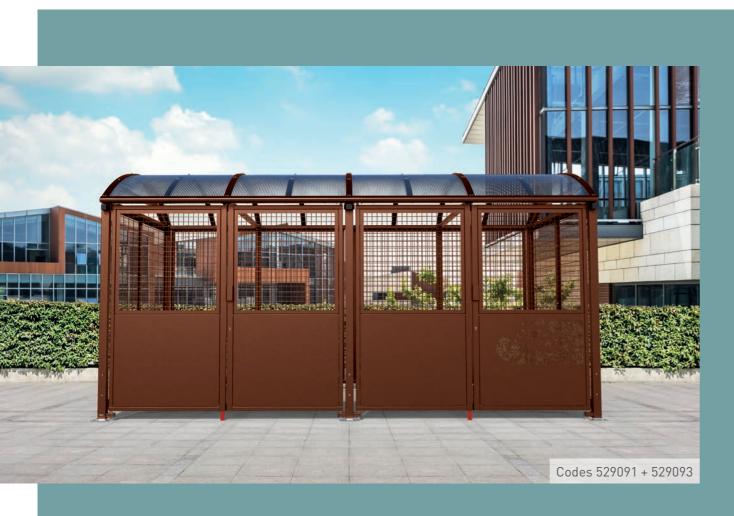

Secure Voute SHELTER

Maximum protection for your bike

Secure Voute SHELTER

PROCITY® offers you its **new shelter** for the secure storage of bicycles, scooters, scooters and motorcycles. Its galvanized steel posts and wire mesh make this product an **effective and durable solution to reduce the risk of theft** of parked two wheelers.

The lateral reinforcement of the barrel roof as well as the double locking door and its narrow steel mesh **reduce the risk of infringement to a minimum**. Optional LED lighting allows users make full use of this secure space day and night.

We offer **two reliable methods of locking**: a European key lock or a mechanical digicode lock (which does not require any electrical installation).

The storage capacity of the initial module allows parking for 6 bicycles or 2 motorcycles, which can be extended to accommodate larger quantities by adding extension modules.

Codes 529091 + 529093

STRONG POINTS

Anti-intrusion roof reinforcements

Visibility inside: no hidden vandalism

Size of the wire mesh does not allow hands to pass through to open the door

Available with mechanical digital code

Hostility & corrosion resistant

Drop bar for holding doors in open and closed position
