

YELLOW TRAFFIC CONE 750MM

pittman[®]

OVERVIEW

The Yellow Traffic Cone is a highly visible traffic management solution designed to highlight hazards and help improve safety for pedestrians and drivers in areas where additional caution is required.

Manufactured with a robust weighted base and a fully reflective sleeve, it provides excellent visibility and stability during outdoor use, making it ideal for roads, car parks, worksites and maintenance areas.

The two-piece design provides added practicality by allowing the cone to be easily replaced if damage occurs, while the stackable construction makes storage and transportation to and from site quick and convenient.

Suitable for a wide range of traffic management and hazard identification applications, the Yellow Traffic Cone offers a durable, practical and highly visible solution for improving safety on-site.

FEATURES

- Robust Weighted Base – helps keep the cone stable and securely positioned during outdoor use.
- Stackable Two-Piece Design – allows for convenient storage, easy transportation and simple replacement if damaged.
- Fully Reflective Sleeve – provides enhanced visibility when used on roads, car parks and worksites.
- High-Visibility Yellow Design – helps clearly highlight hazards and improve visibility for pedestrians and drivers.
