

The Lis beacon is a highly efficient product designed for lighting and marking paths, parks and pedestrian areas. Among its main features, its mechanical robustness and resistance to corrosion should be highlighted. Made of 3mm galvanised steel with epoxy primer coating and black oxiron polyester coating. Easy maintenance thanks to the installation of an inspection door according to EN40 and low-voltage electrical regulations, making it easy to change the bulb by removing the stainless steel cover on the top.

Recommended anchoring: by means of four M16 bolts.

#### LED Built-in CoB

- 3000oK 996lm | 4000oK 1050lm
  - CRI>80
  - Input power 15W
  - Vin 220-240Vac 50/60Hz
  - High input power factor >0,95
  - Lifespan 50.000h (L70/B50)
  - Class I
- Optional:
- Other colours.
